2012 Summer Mentor Institute

Making the Load Lighter: Collaborating for Joyful Teaching and Learning

August 13-17, 2012

Holiday Inn in Bozeman

The theme of this year's institute is Collaboration. The institute is designed for all partners who collaborate on behalf of Montana's students to attend—teachers, paraprofessionals, administrators, parent volunteers, education faculty, education majors, and recent education graduates. This year the institute will focus on two strands: Learning-Focused Relationships and Co-Teaching. The institute includes two days of skills and concept training (Learning-Focused Relationships) and a two-day session on co-teaching as a specific mentoring model. You are encouraged to send teams to the training, but this is not a requirement. A registration discount will be offered for attending teams. The institute aligns with Montana Correlates in the following areas: Academic Performance—Instruction, and Learning Environment—Professional Growth and Development. The institute will provide renewal units and graduate credit (for an additional cost).
